

RAZONAMIENTO ABSTRACTO: SERIES GRÁFICAS (\$4 TIMES 4\$)

Estudiante: _____

Fecha: ____/____/2026

Curso: _____

1. Descubre el patrón de traslación diagonal invertida y determina cuál de las opciones (A, B, C o D) completa la serie:

Fig. 1

→

Fig. 2

→

Fig. 3

→

Posición (?)

Opción A

Opción B

Opción C

Opción D

2. Analiza la rotación horaria de los bloques en las esquinas de la cuadrícula:

Fig. 1

→

Fig. 2

→

Fig. 3

→

Posición (?)

Opción A

Opción B

Opción C

Opción D

3. Serie de contracción simétrica (el perímetro se reduce hacia el centro):

Fig. 1

Fig. 2

Fig. 3

Posición (?)

Opción A

Opción B

Opción C

Opción D

4. Patrón de incremento de filas (llenado horizontal progresivo desde abajo):

Fig. 1

Fig. 2

Fig. 3

Posición (?)

Opción A

Opción B

Opción C

Opción D

5. Patrón alternante en cruz (Observa los cambios de estado entre celdas blancas y oscuras):

Fig. 1

Fig. 2

Fig. 3

Posición (?)

Opción A

Opción B

Opción C

Opción D

6. Movimiento de "Serpiente" o Snake (recorrido zig-zag continuo de 3 bloques):

Fig. 1

Opción A

Fig. 2

Opción B

Fig. 3

Opción C

Posición (?)

Opción D

7. Patrón de simetría axial reflexiva (efecto espejo vertical de izquierda a derecha):

Fig. 1

Fig. 2

Fig. 3

Posición (?)

Opción A

Opción B

Opción C

Opción D

8. Resta lógica de bloques (Operación booleana paso a paso):

Fig. 1

-

Fig. 2

=

Fig. 3

Posición (?)

Opción A

Opción B

Opción C

Opción D

9. Progresión de dispersión (los cuadros se alejan del centro simétricamente):

Fig. 1

Opción A

Fig. 2

Opción B

Fig. 3

Opción C

Posición (?)

Opción D

10. Patrón rotatorio de hélice o molino (giro antihorario de 90° en cada paso):

Fig. 1

Fig. 2

Fig. 3

Posición (?)

Opción A

Opción B

Opción C

Opción D

🔑 **Clave de Respuestas (Para el Docente):**

1: A | 2: B | 3: C (Vacío) | 4: B (Lleno total) | 5: B | 6: A | 7: B | 8: A (Es la Fig.3 idéntica) | 9: A | 10: A
